

Python Question Bank

Unit-1

1. What is indexing and negative indexing in string? With ex.
2. Explain features of python.
3. What is the difference between = and is operator in Python?

Unit-2

1. List all types of python operators.
2. What is tuple? Difference between list and tuple.
3. What is Comprehension? What is List Comprehension? Illustrate it with example.
4. What is Comprehension? What is Dictionary Comprehension? Illustrate it with example.
5. What is mutable and Immutable data type? Explain with example.
6. What are the built-in-functions that are used in Tuple?
7. How to pass two dictionaries to the function and add elements of one dictionary to another. Write the code for it.
8. difference_update() in set.
9. How dictionary can be created in python? Explain with example.
10. Set fun (1)discard() (2) clear()
11. Set fun (1) capitalize() (2)rstrip()
12. How append() and extend() are different with reference to list in python.

Unit-3

1. Explain Instance method, Class method and static method in python.
2. Explain in details about namespaces and scoping.
3. W.a.p to implement multiple inheritance.
4. W.a.p to demonstrate the use of Class variable , Instance vari and local vari. in python.
5. Explain global vari. In python.
6. How to declare class and obj in python.
7. Custom exception with ex.

Unit-4

1. Explain sys module and input output operations using sys module.
 2. Explain time module and at least 5 functions of time module.
 3. What is meant by module in python? List some built in modules in python. Explain with example how to create a user defined module module and how to use it.
 4. What are packages? Give an example of package creation.
 5. Explain the types of arguments in python.
 6. W.a.p to remove duplicate values using user defined functions.
 7. 7. Explain module in python with example.
 8. Filter vs. map with ex.
 9. Working of map & filter with ex.
-

- 10.
11. Discuss the use case of reduce with ex.
12. Explain all types of arguments for user defined fun using ex.

Unit-5

1. What is file. Explain access modes of file.
2. List some few common Exception types and explain when they occur.
3. W.a.p to read a file and identify total no. of unique words, total no. of words, total no. of lines
- 4.

Unit-6

1. Write program for binary search.
2. Write program to sort data using bubble sort..
3. Explain sorted method with arguments using ex.

General

1. Explain memory management in python with ex. With python.
 2. Explain Garbage mechanism using example.
 3. W.a.p to overload *str* method for custom exception.
 4. Workingg of Garbage collection.
-
